

SIMPLE SOLUTION FOR FAULT LOCATION

During manufacturing or while operating on a patient, one of your circuits has a fault, halting everything. Critical time is wasted while searching for this circuit and you need to know exactly where the problem is — and quickly!

Enter Bender EDS Technology! Bender's EDS systems are capable of detecting which circuit is contributing to a ground fault on an ungrounded or isolated power system.

Benefits

Avoids interruption of operation

Reduces maintenance costs

Automatically locates faults

Clear indicator display to easily diagnose issues

ISOSCAN[®] EDS440 Series for Industrial Applications

EDS441 for Healthcare Facilities
